— BRAND & PRODUCT DESIGN

Design Review.

Metropolitan direction. Top-Down Build V2 mark. Metropolis display type, CamelCase AwesomeStudioPedal wordmark, warm amber on dark. Mobile app (Flutter) and three web tools — Simulator, Profile Builder, Configuration Builder — themed to match.

— SECTION 01

Identity.

Logo, wordmark, monogram. Color system. Type system. Interaction components.

— WEIRD / METROPOLITAN

A foot-switch for the modern player.

Weird direction — 1920s geometric-moderne. Metropolis (Dwiggins-style Metro revival) sets the tone: tall, elegant, precise. Feels like a vintage studio nameplate.

PRIMARY MARK
